## EXPERIENCE

### Appect Software, Remote — *Software Engineer*

Aug 2019 - PRESENT

Building out a communications application with ReactJS, Express, Postgres, Knex working in private repositories.

## PROJECTS

### Crime Statistics For Travelers — *Fullstack*

1. Spent two weeks developing a PVD and developed 4 release canvases
2. Used Tilesets and Geojsons to create a data driven map
3. Built out Authentication With Auth0 and JWT
4. Used Mapboxes Geolocation API
5. Used the FBI's CDE for Data
6. Context API used for Large State Management
7. Data visualization is done with RechartsJS
8. Used Git & Github for version control on our app.
9. Worked with a team of developers to meet an MVP

Production Deployment: <https://crime-statistics-master.netlify.com/>

FrontendCode: <https://github.com/Lambda-School-Labs/crime-statistics-for-travelers-fe>

BackendCode: <https://github.com/Lambda-School-Labs/crime-statistics-for-travelers-be>

## EDUCATION

### Lambda School — *Computer Science*

A software education designed to train you for a job. You work remotely with a team of developers to build and launch products with planned release canvases

## SKILLS

ReactJS

ExpressJS

NodeJS

Pandas

PostgreSQL

KnexJS

Mapbox-GL-JS

ElectronJS

Python
